

ABSTRACT OF THE DISCLOSURE

A method of providing an article to meet an actual or anticipated demand for the article. The method includes the steps of: providing an article having an exposed surface defined by at least one substrate layer; providing a first
5 adornment layer; tack stitching the first adornment layer fixedly to the at least one substrate layer with thread at at least first and second discrete locations on the first adornment layer so that the article has a first appearance; stocking the article with the first appearance to meet an actual or anticipated demand for the article having the first appearance; changing the appearance of the article from the first
10 appearance to a second appearance; and making the article with a second appearance available to meet an actual or anticipated demand for the article. The step of changing the appearance of the article from the first appearance involves the steps of: releasing the tack stitching at the at least first and second discrete locations to allow the first adornment layer to be separated from the article;
15 separating the first adornment layer from the article; providing a second adornment layer; and attaching the second adornment layer fixedly to the article.
